

**MAHLE Test Systems announces Heavy-Duty service tool collaboration with Movimento, Inc.**

MAHLE's ServiceLogiq™ software now available for Heavy-Duty vehicle applications!

Novi/Michigan, September 28<sup>th</sup> 2009 - MAHLE Test Systems announced industry-wide availability of their ServiceLogiq™ diagnostic service tool software for Heavy-Duty vehicle applications using Movimento's RP1210 compatible Puma 2 intelligent Vehicle Communication Interface i(VCI).

MAHLE Test Systems, a division of MAHLE Powertrain, LLC, is a major supplier of software products for manufacturing and dealership applications. Movimento, Inc. develops products to the vehicle industry in the areas of network communications, diagnostics, software download and telematics.

ServiceLogiq™ is MAHLE Test System's vehicle diagnostic software application for the service bay. It seamlessly integrates with MAHLE's Visual Authoring Tool (VAT®) for "codeless" applications development, including screen layout. ServiceLogiq™ has the ability to run stand-alone or from a central web server allowing OE's flexible deployment options and eliminating the need to distribute application updates. Its fast execution rates (less than 10 second start-up and screen-to-screen less than 1 second) are an industry best. The software easily supports scanners, scopes and other vehicle measurement devices. Since ServiceLogiq™ runs from any standard internet browser, it also easily integrates other OE diagnostics and data such as Technical Service Bulletins, wiring diagrams and reports. Diagnostic session data

can quickly be analyzed with MAHLE's ReportLogiq™ web based reporting software for fast turnaround of early warranty concerns.

"This new capability was added into our test suite for our Heavy-Duty customers" states Chuck Heine - Managing Director, MAHLE Powertrain, LLC. "These customers will benefit greatly from the productivity improvements inherent with the complete transparency of the applications across all groups – Product Development, Service Operations, Quality and IT."

"Movimento is pleased to formalize our close working relationship with MAHLE Test Systems. Integrating our industry leading next generation RP1210 solution with MAHLE's test suite provides our heavy truck/off-highway customers an end-to-end solution for all phases of the product life cycle." says Movimento, Inc. Vice-President, Justin Schroeder.

MAHLE Test Systems offers tools and technical expertise for testing vehicle and powertrain electronics for all stages of the vehicle life cycle. MAHLE is a trusted supplier in the development of new testing solutions for various OEM applications ranging throughout the product lifecycle. Test Systems has helped their customers achieve "best in class" build quality (per 2008 J.D.Powers' report on Initial Quality Study ratings for OEM electrical warranty) while supporting increasingly complex vehicle testing requirements.

MAHLE Powertrain, LLC is part of the MAHLE Group which is among the top 30 automotive suppliers globally and is the world market leader for combustion engine components, systems and peripherals. MAHLE employs approximately 45,000 employees in over 100 production

*Test Systems*

plants and eight research and development centers. In 2008, MAHLE generated sales in excess of EUR 5 billion (USD 7.4 billion).

Movimento, Inc. is the leader in the Heavy-Duty trucking industry with best in class performance iVCI's and is part of Movimento Group AB based in Gothenburg, Sweden. With global customers like Navistar, Renault and Volvo truck they provide industry leading next generation RP1210 solutions to the market.
